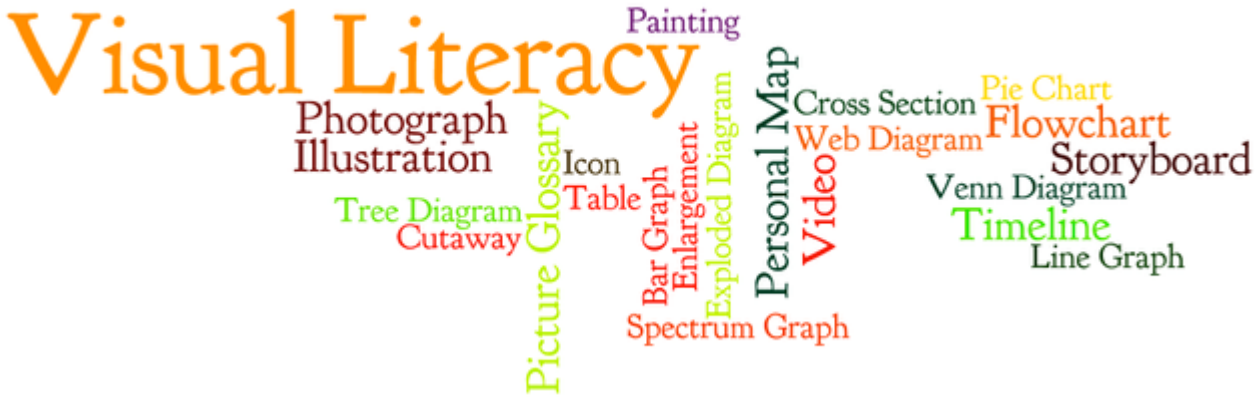
Spring 2018 VE300
Week 6
Lecture Notes

VE300 Presentation

10 minutes total (strict time limit)

If your group goes over 10 minutes,

- you may show but not discuss your remaining slides
- all the group members lose some points



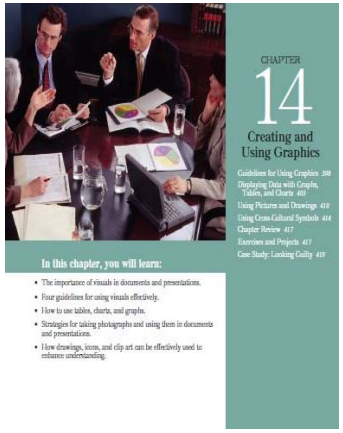
Visual communication

- Communication design
- Information design
- Graphic design

Matching graphics to objectives

Communication Needs → **Effective visual choices**

Assigned reading



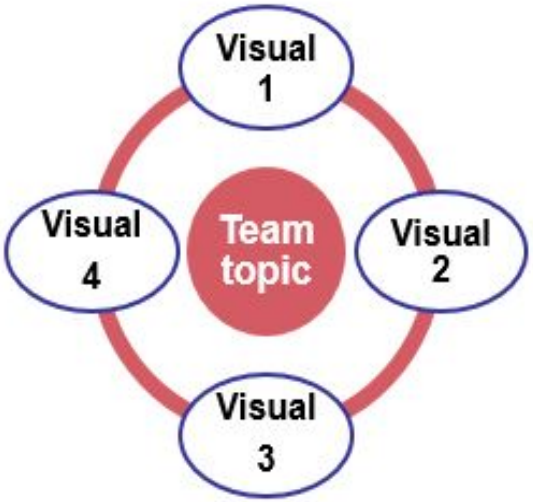
CHAPTER
14
Creating and Using Graphics

Guidelines for Using Graphics 398
Displaying Data with Graphs, Tables, and Charts 400
Using Pictures and Drawings 410
Using Cross-Cultural Symbols 414
Chapter Review 417
Exercises and Projects 417
Case Study: Looking Guilty 419

In this chapter, you will learn:

- The importance of visuals in documents and presentations.
- Four guidelines for using visuals effectively.
- How to use tables, charts, and graphs.
- Strategies for taking photographs and using them in documents and presentations.
- How drawings, icons, and clip art can be effectively used to enhance understanding.

When to use visuals?



- To clarify
- To simplify
- To emphasize
- To attract with visual symbolism
- To impress with real evidence
- To inject humor or other emotions
- To unify spoken words & visual meaning

Scoring criteria:

As a group:

- Do you introduce enough context for understanding the visuals?
- Are the visuals logically related?

As an individual speaker:

- How well do you explain the visual messages in the slides?

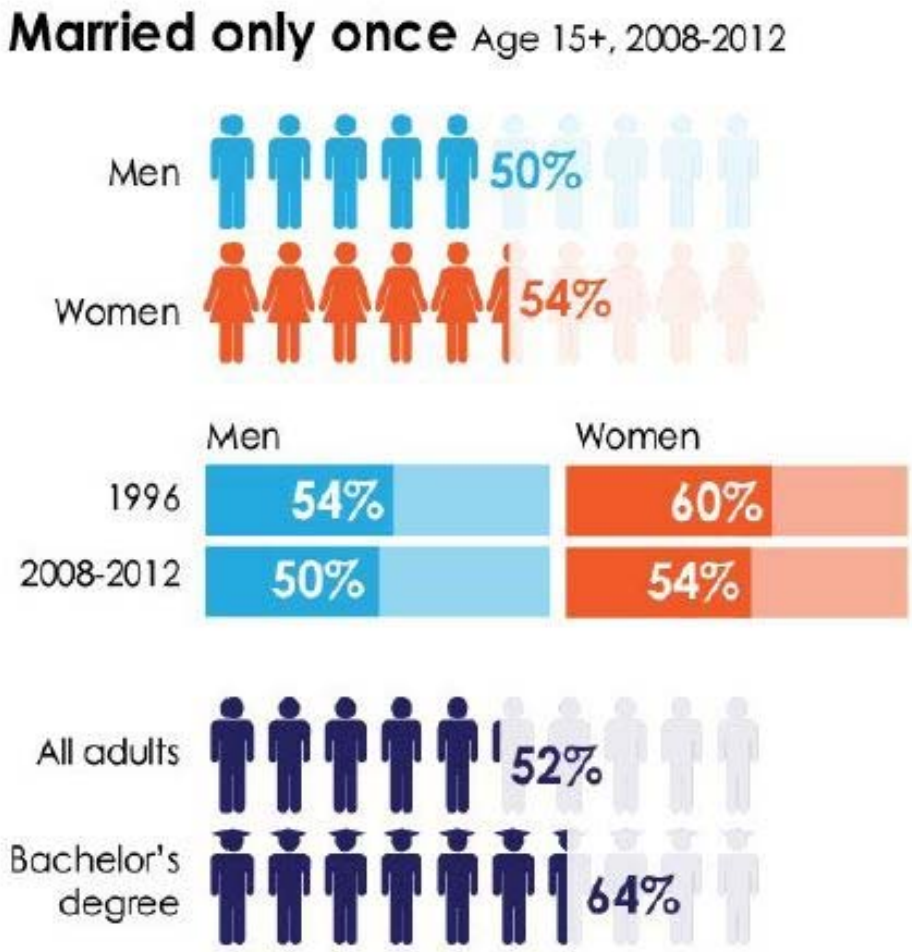
Slide preparation
Oral delivery

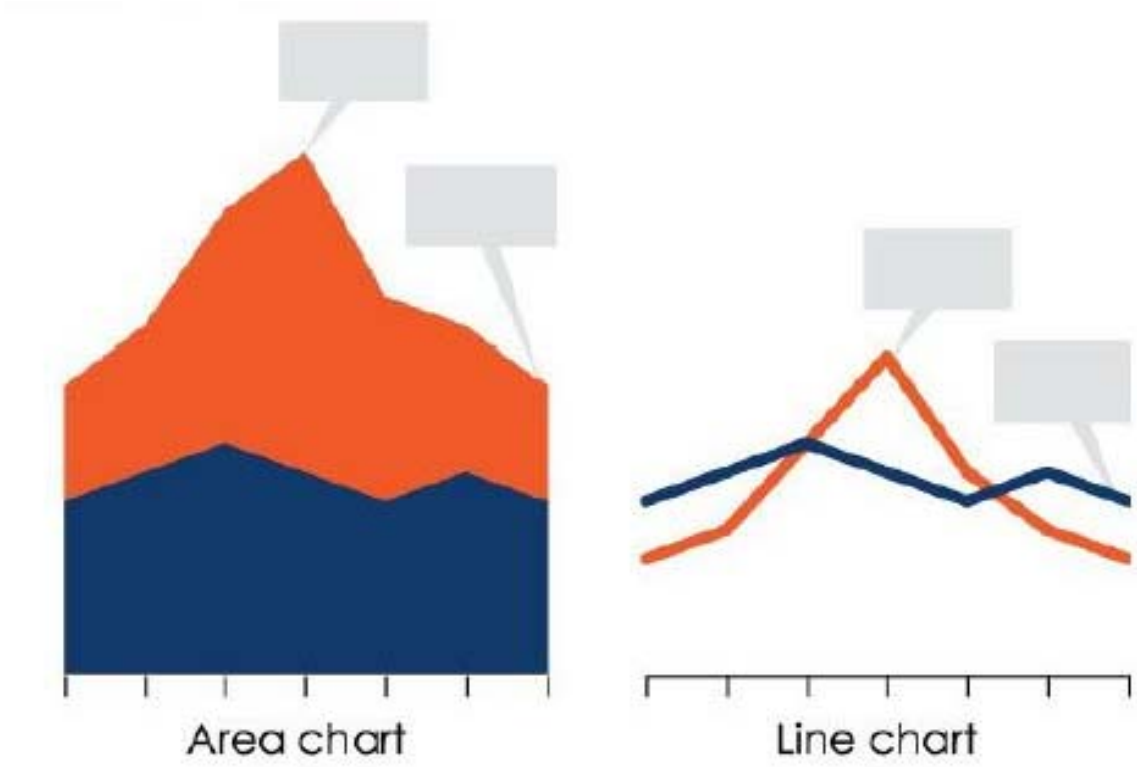
Preparing your slide:

- Color scheme → **contrast**
- Font type & size→ **minimum 24 for body text**
- # of main idea per slide → **1**
- # of bullet points per slide → **no more than 6**
- Position and size of visual aids → **balance & alignment**

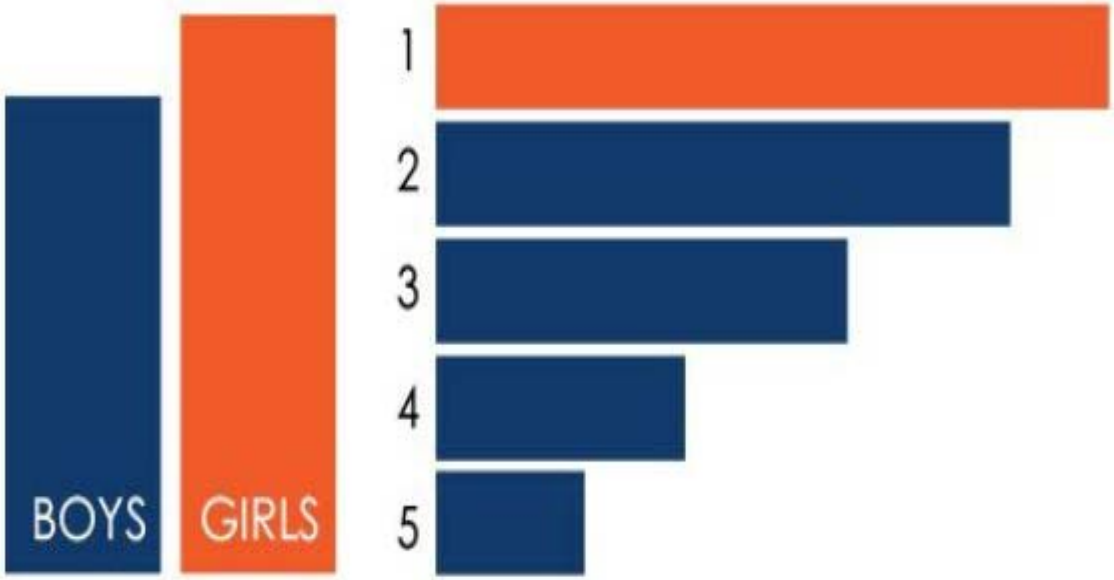
Data about people:



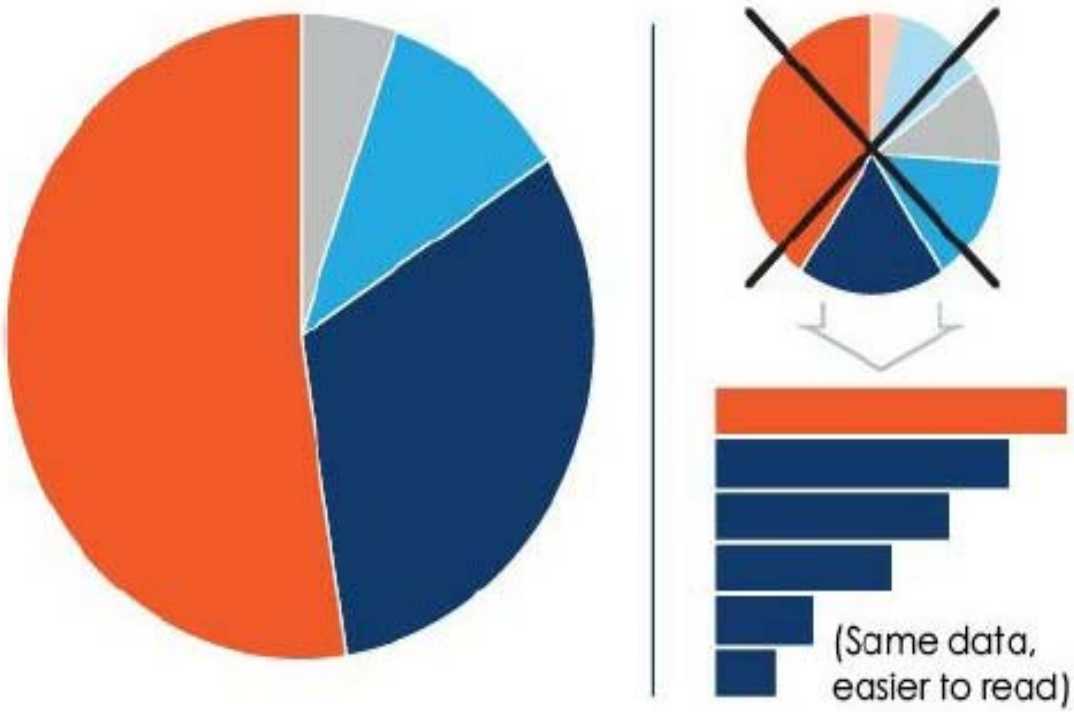
Trending: Rise vs. decline
Comparison vs. competition



Listing & ranking

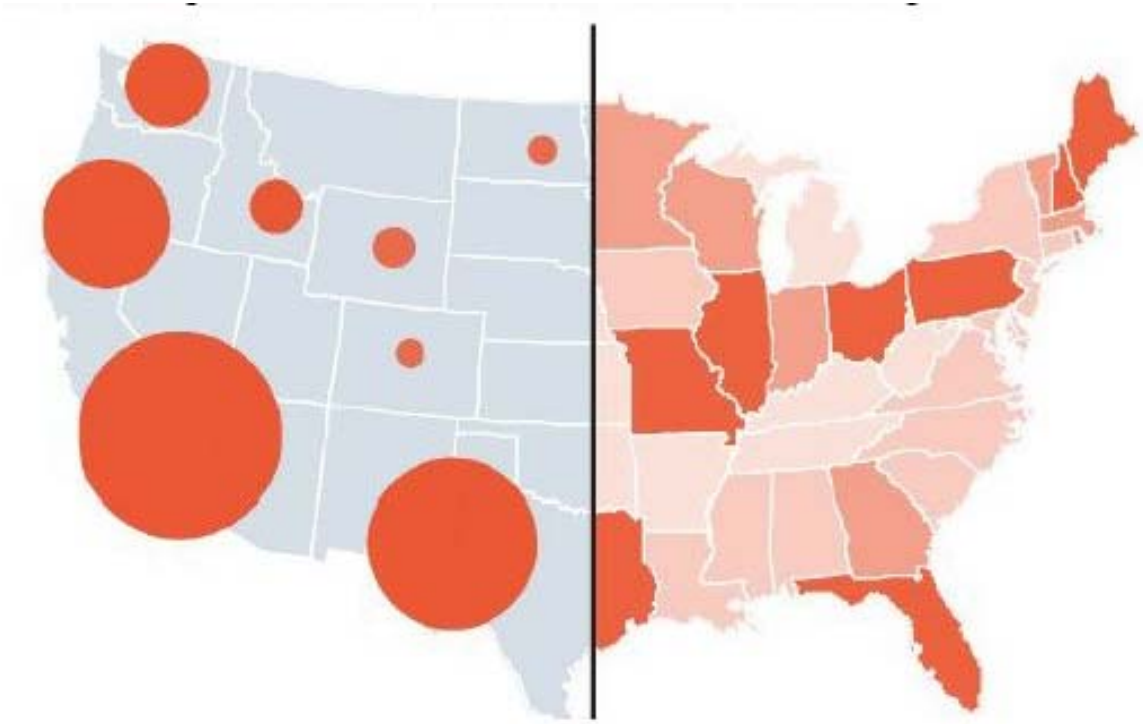


Parts in a whole



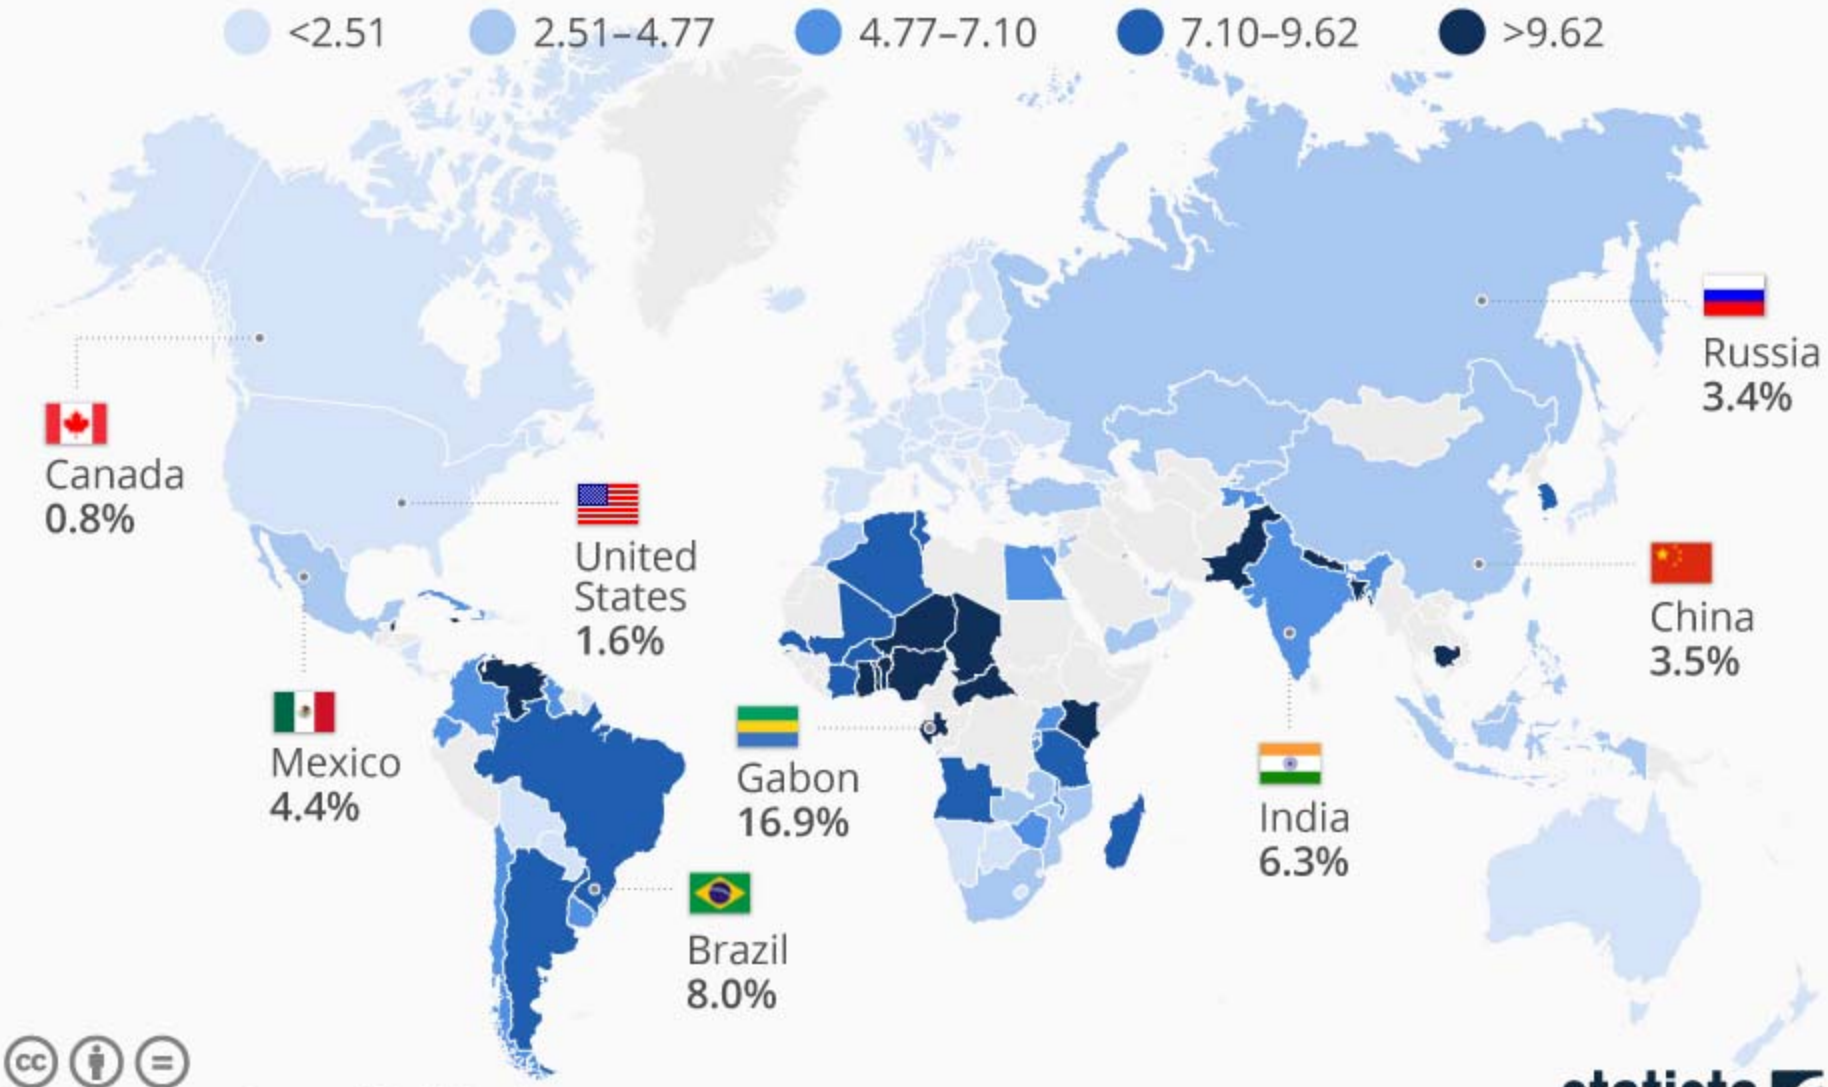
Show where

Data associated with location



Where Global Tariffs Are Highest And Lowest

Average weighted tariff rate applied across all products in 2016 (%)

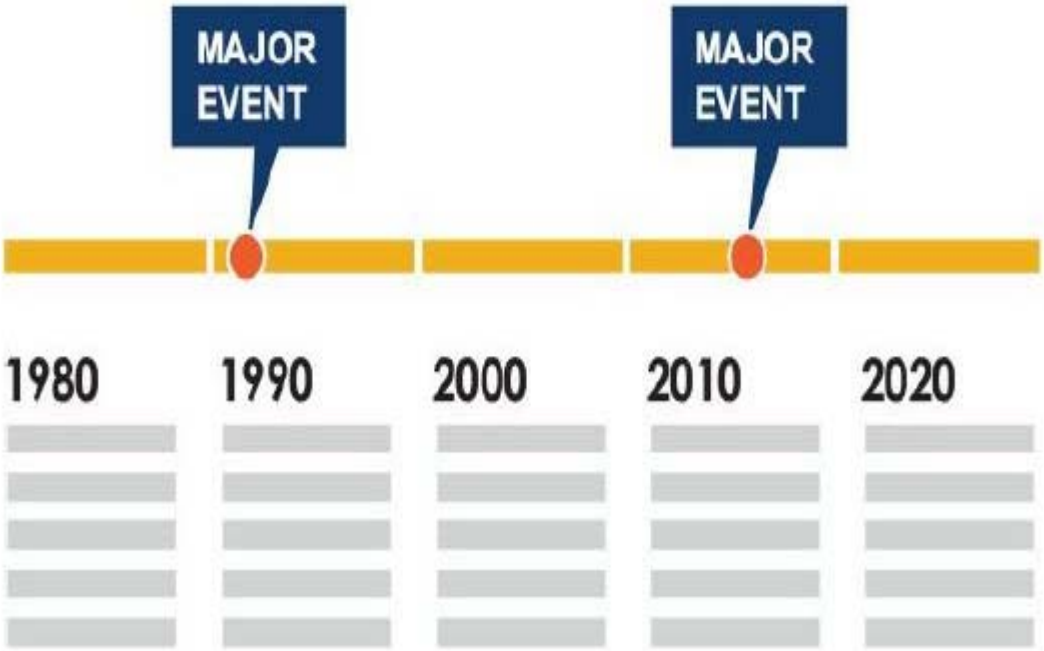


@StatistaCharts

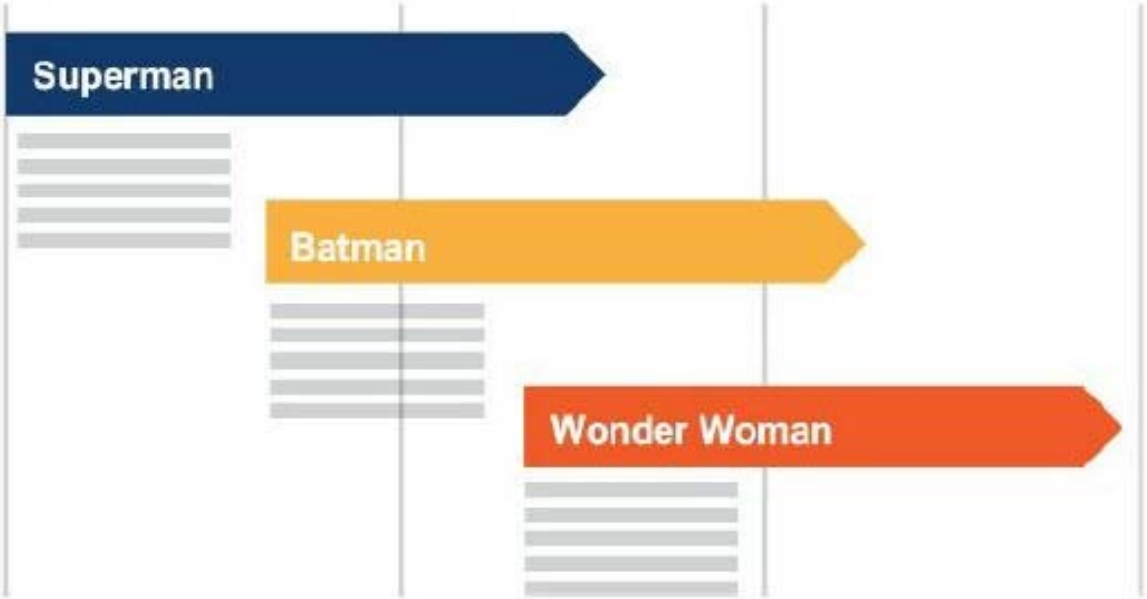
Source: World Bank

statista

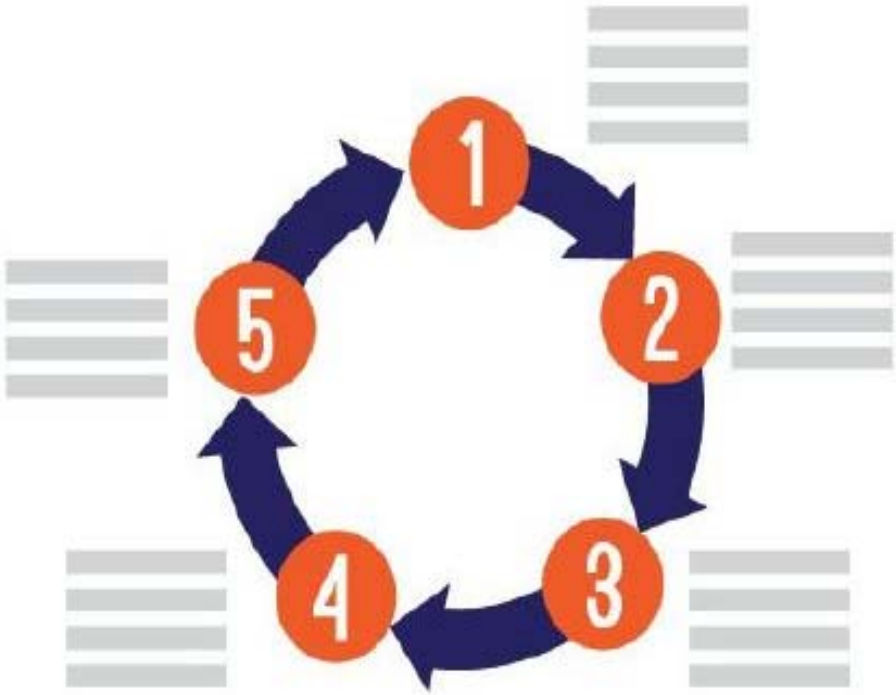
Chronology: major & minor events



Project tracking or multiple events

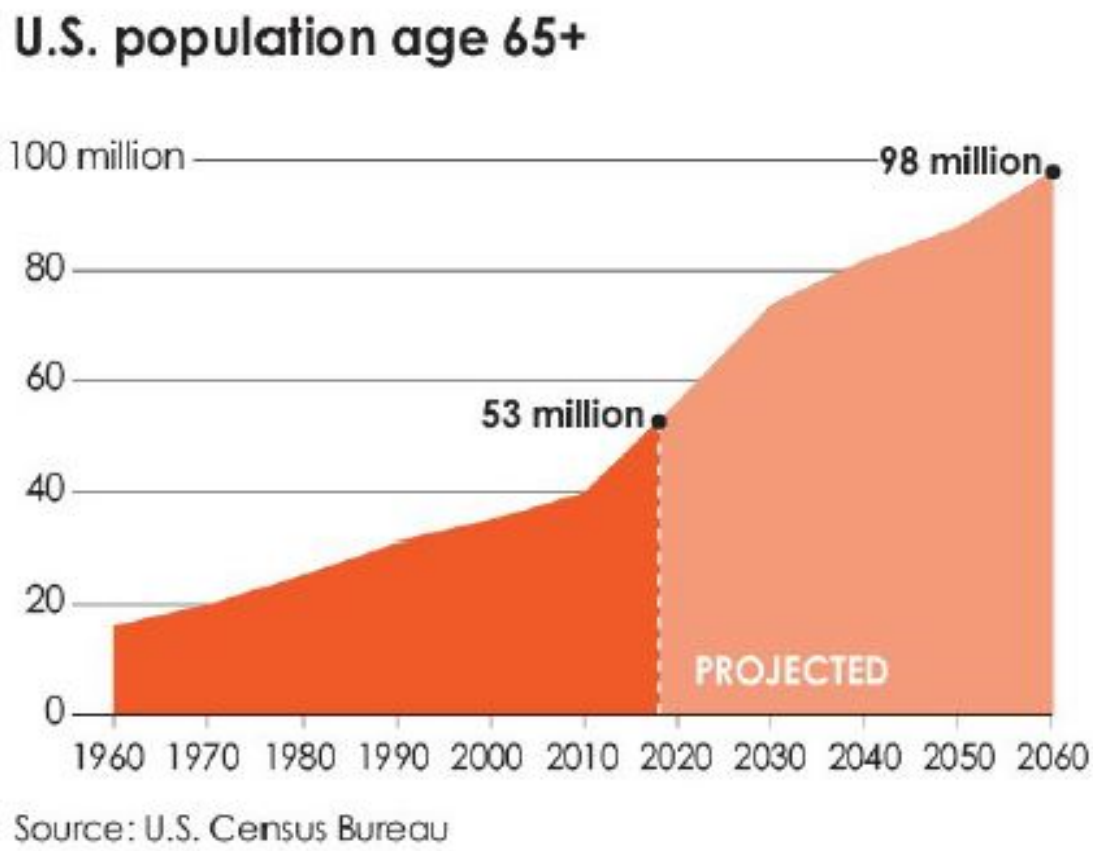


Circular = cycle, something ongoing

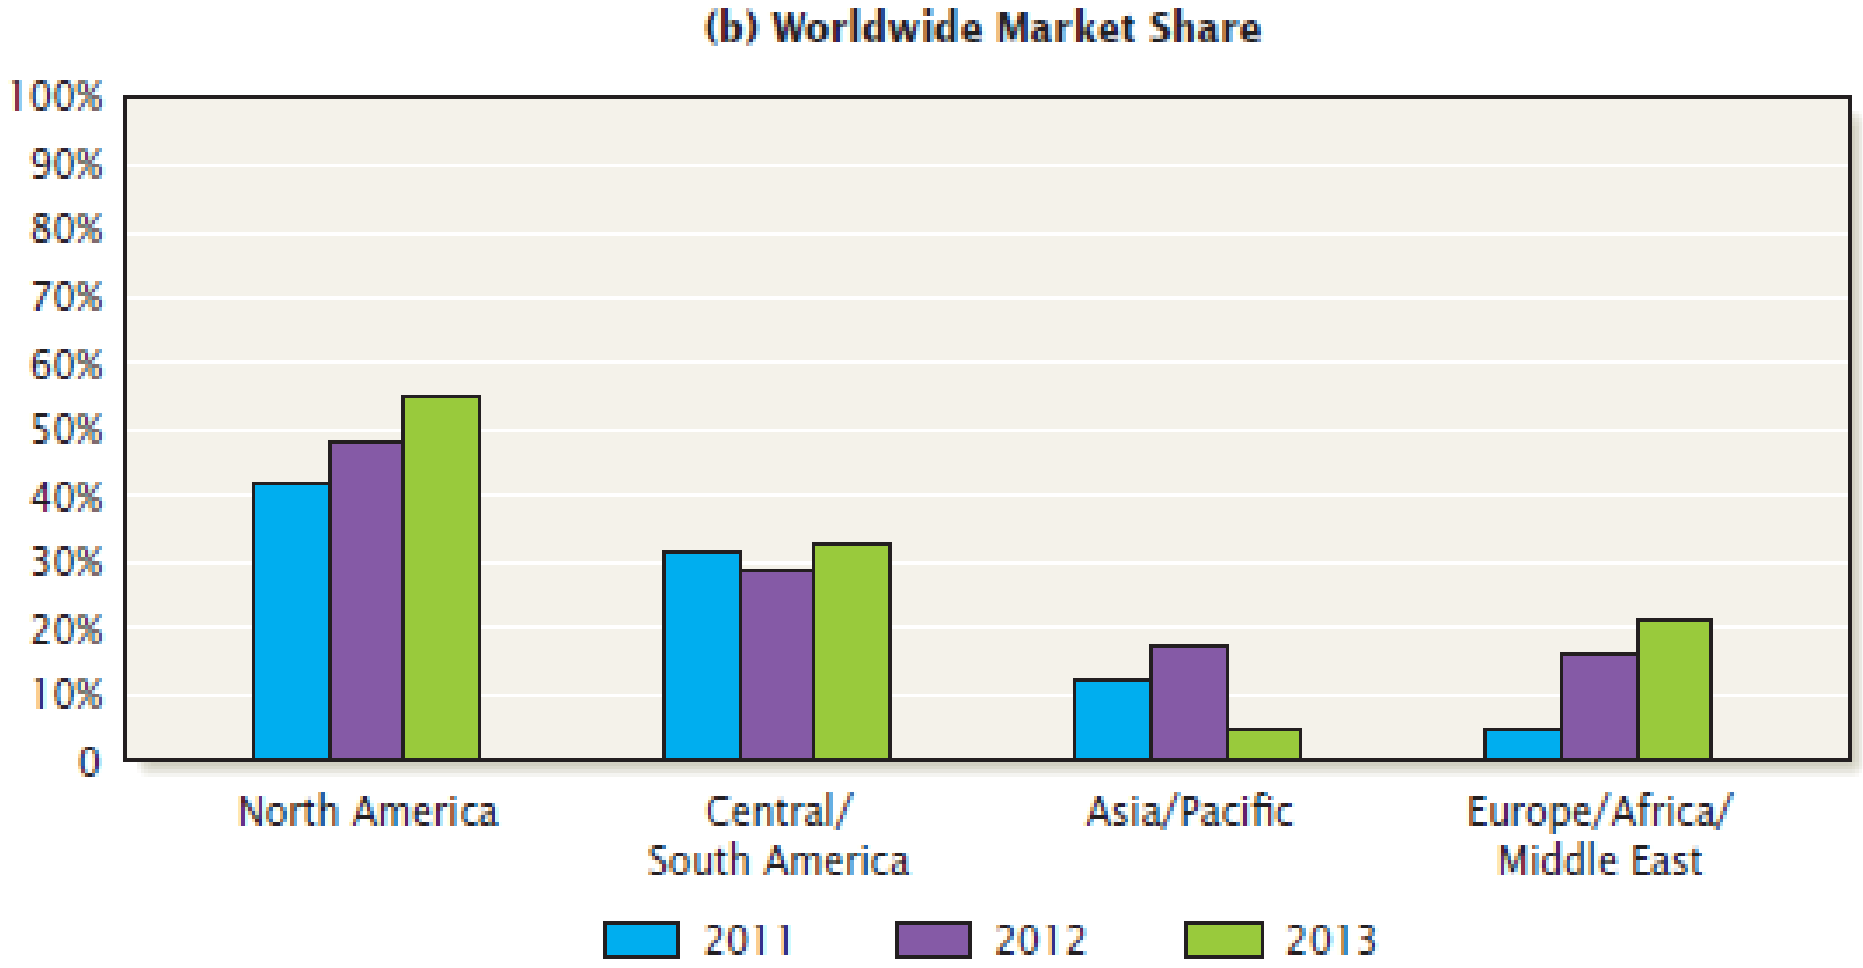


Journey = implies complexity, not efficiency

Making a forecast



Titles Legends

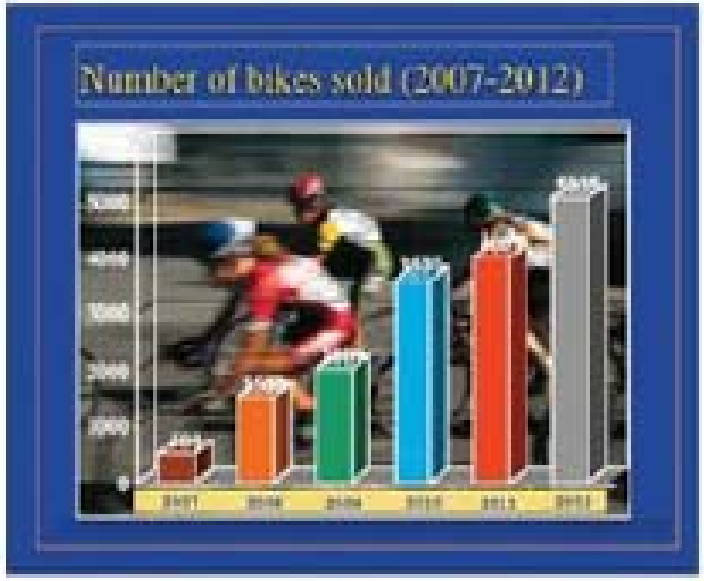


Avoiding Chartjunk

What makes *chartjunk* in a visual: Those elements that "act as noise where your readers need silence."

Chartjunk in a visual:

Those elements that "act as noise where your readers need silence."



Applying colors to visuals

Tip #1:

If you want objects in a table or graph to be easily seen, use a background color that *contrasts* sufficiently with the object.

Tip #2:

Color should be used to enhance data, not for decoration.
In many cases, less color may be better.

Yellow on white does not show well.

About visual aids

- Complement your speech
- Increases your credibility
- Should not become the presentation

Your message is more important than the visual

Navigation slides

Help your audience keep track of what you've covered already and what you plan to cover next.

Before revision

Reasons for Selling Online

- Your online business can grow globally.
- Customer convenience.
- You can conduct your business 24/7.
- No need for renting a retail store or hiring employees.
- Reduce inquiries by providing policies and a privacy statement.
- Customers can buy quickly and easily.

After revision

Why You Should Sell Online

Grow business globally.

Offer convenience to customers.

Conduct business 24/7.

Save on rent and staff.

Create policies to reduce inquiries.

NONPARALLEL

The sequence we follow:

1. Writing of the outline
2. Do library search
3. Interview with the president
4. First draft
5. Revision o first draft
6. Preparing the final draft

PARALLEL

The sequence we follow:

1. Write the outline
2. Do library research
3. Interview the president
4. Write the first draft
5. Revise the first draft
6. Prepare the final draft

Readability vs. complexity

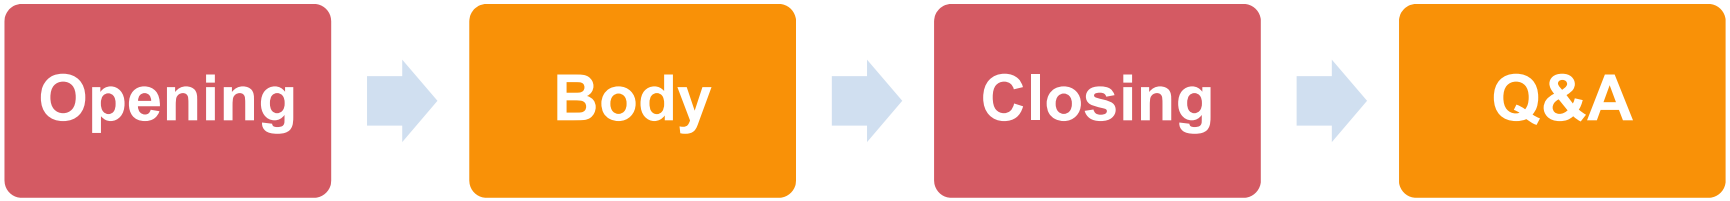
- Font size is large enough
- Colors are distinguishable
- Captions are short, easy to read, and meaningful
- Legends are clear and easy to understand
- All contents have been proof-read

2%, 3%	outline draft, final outline
14%	Presentation (points may vary)
9%	Presentation slides

Today's topics:

1. Know the sequence of your ideas
2. Commenting on visuals

2. Know the sequence of your ideas



First 3 minutes

1. Get the audience's attention
2. Introduce your subject
3. Give the audience a reason to listen
4. Establish your credibility
5. Preview your main ideas

Creating your hook:

Story telling

Emotional appeal

Dramatic impact

- Use a one-on-one conversational tone
- Use the “you” attitude

Stating your purpose: Presentation verbs

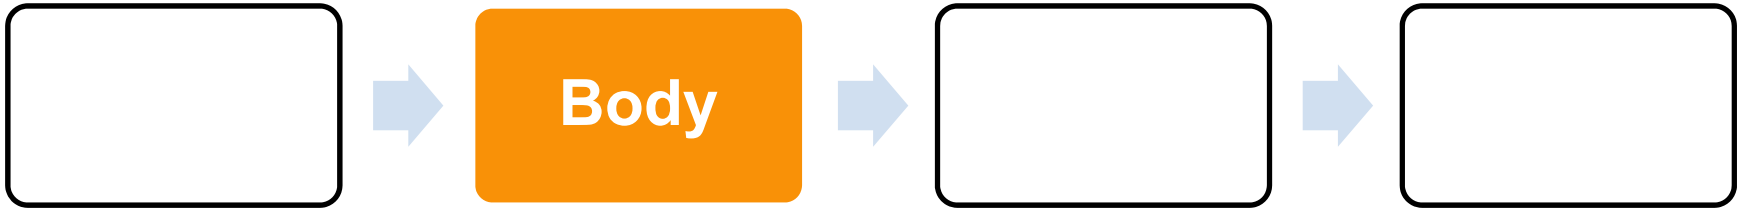
2 readers

Hello everyone. I'm (your name).

This morning I'm going to be taking a look at the recent boom in video game companies. I'll begin by giving you an overview of the history of online games. Then I'll go on to make detailed recommendations regarding our own R&D.

Hello everyone. I'm (your name).

This morning I'm going to be talking to you about the videophone project. I will begin by filling you in on the background for the project. Then I'll go on to highlight what I see as the main advantages of the new system.



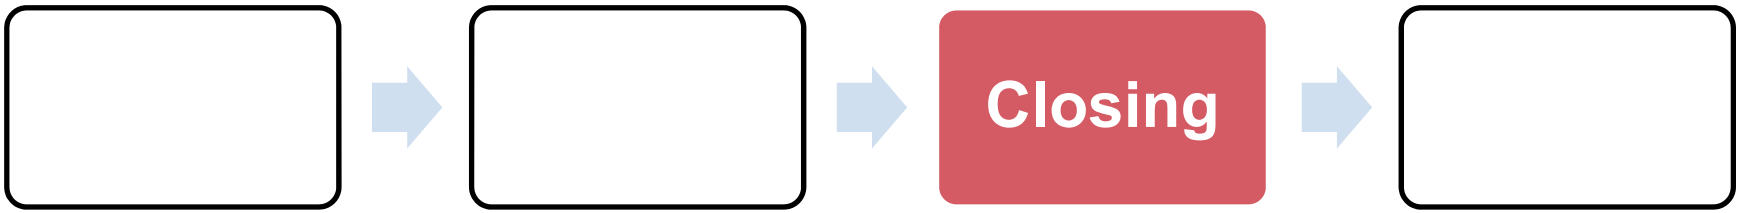
TRANSITIONS:

1. I will now hand over to CP who will speak to you about funding opportunities.

2. So that's a summary of the situation. FB will now discuss why this has happened.

3. AW will now walk you through the company's projections for the future.

4. Having discussed the advantages, we can now examine the disadvantages. XY will help us highlight 3 major disadvantages.



- Restate your main point.
- Refer to your opener to create a frame for your presentation.
- End with a vivid, positive picture.
- Suggest directions for future research

Commenting on Visuals

1. **Highlights** Which parts of the visuals are most significant?
2. **Comments** Why?
3. **Conclusions** What conclusions can you draw?

on
to
at
out
about

	us to look	1. …this part of the graph in more detail
	us to focus our attention	2…. one particularly important feature.
I'd like	you to think	3…..the significance of this figure here
	to point	4…..one or two interesting details
	to draw your attention	5…..the upper half of the chart

If
As
Whatever
Whichever
However

1…….you can see, there are several surprising developments.

2…….you look at it more closely, you’ll notice some anomalies.

3…….you try explain it, this is very bad news.

4……the reasons for this, the underlying trend is obvious.

5……way you look at it, these are some of our best results ever.

lesson
message
significance
conclusions
implications

1….to be drawn from this are

2…. To be learned from this is

I'm sure the 3…..of this are **clear to all of us**

4…..of this is

5…..here is

3 main scoring criteria:

1. **Connect with your audience**
   - eye contact
   - voice quality
2. **Know the sequence of your ideas**
   - make clear transition from one member to the next
3. **Communicate with graphics**
   - visualize information

As a group:

- Do you introduce enough context for understanding the visuals?
- Are the visuals clearly and logically related?

As an individual speaker:

- How well do you explain the visual messages in the slides?
