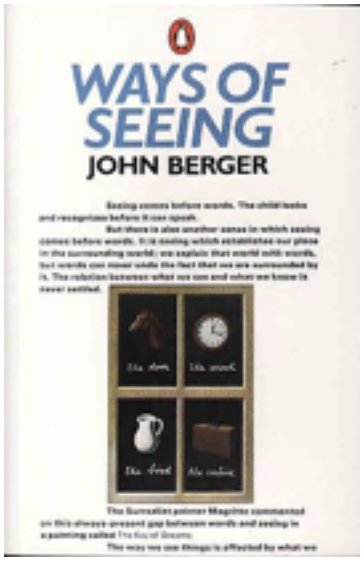
VR251 John Berger
Ways of Seeing Questionnaire

1. If seeing isn't as natural as we think, what is the 'seeing' convention for European art, according to Berger?

2. How does this convention affect the relationship between viewer and 'Reality' - the presumed reality of the painting?

3. Why isn't this viewing experience a 'real' one - in other words, what makes the experience one of Appearances rather than of Reality?

4. What are the limitations of the human eye in perceiving ‘the world’?



5. How does the Camera change the relationship between the eye and the world (world of art included)?

6. What properties describe both the original work of art and the human eye?

7. How did the camera change paintings, even paintings created before the camera itself?

8. How is Meaning affected by reproduction?

9. How does Context relate to Meaning?

10. How do Uniqueness and Authenticity relate to Reproduction?

11. If Art used to be seen as object of ritual or 'cult,' what status followed?

12. What has Art gained or Lost through Reproduction? What is 'Mystification'?
